ETF / 2013-June-25

NEWSLETTER OF THE BOARD - 2/2013

This is only a short update, of the ETF-News since the GM in April 2013.

### **ETF works with a President again:**

The ETF-board likes to give you the information that the ETF-board – and the ETF-members decided to change the actual organisation of the board. After some careful consideration and discussions we came to the meaning, that the situation without a president doesn't really makes sense. We only have drawbacks but no benefit with this signal – especially for external partners ... so I will act as the ETF-President during the next two years. This decision was taken by a round mail-voting within the ETF-board and within the ETF-delegates as well. The work for the person in charge as a president or as a vice-president is the same – as long as there is only one person, for the two functions...

I thank all of you for your confidence and hope that ETF can grow and become more and more important and helpful for the European Taxidermy-community.

Please don't forget, that there are more committed persons needed, to keep ETF running!

### **New Rules and Regulations for the ETC®**

The second information concerns the work of the Competition-Group. Matthias Fahrni, Berend Koch and Iginio Bressan made a big work to rework and adapt the ETC®-rules and regulations. After the experiences of the past ETC-events all involved persons saw, that a fundamental and efficient rework of the grown ETC-rules were needed.

Please take the time to read and study the new regulations! They will be the base and in force at the coming ETC® in Longarone 2014. I hope you will like– as I do – the well done work of the Competition Group! Thank you for this big effort!

You find the full-text of the new ETC-Rules and Regulations on the ETF-homepage ([www.eurotaxidermy.eu](http://www.eurotaxidermy.eu)) ... beside all the other actual or important information and News about ETF.

On behalf of the ETF-board with kind regards

Christoph Meier  
President
